

Advanced 2-in-1 VoIP Communication Solution

GoldStar

DSG GoldStar is a new generation VoIP adapter that supports both dial-up and broadband connections and provides complete Internet telephony services solutions. Whether you connect to the Internet through the modem or LAN, what you need is only ONE GoldStar! This amazing device makes your international and long-distance charges disappear from your phone bill. All you have to pay is the local Internet/Intranet connection fee!

► GoldStar Introduction

The GoldStar is a state-of-the-art design that applies to subscribers using dial-up, xDSL or Cable. You don't need to replace the GoldStar when you upgrade dial-up service to a broadband Internet connection. Besides, the user-friendly interface and setup program allows you to use and to configure easily.

Thanks to DSG's JustDialIt technology, simply pick up the phone and make a call as usual; the GoldStar will do the rest for you. No computer or monitor is needed! The GoldStar works intelligently with your Internet or any TCP/IP networks, distinguishing itself as the most innovative modem/Ethernet phone adaptor.

Whether or not the receiver of your call is equipped with another GoldStar, you can still enjoy the advanced Internet phone call services provided by DSG Technology. With DSG advanced ITSP Services covering more than 90 countries, you will be able to call any regular phone in the world or other VoIP devices provided by DSG. The GoldStar is the most economical and complete solution for long-distance and international calls available today. So what are you waiting for? Just call around the world, anyone, anytime and anywhere with DSG GoldStar!

Cost-Saving

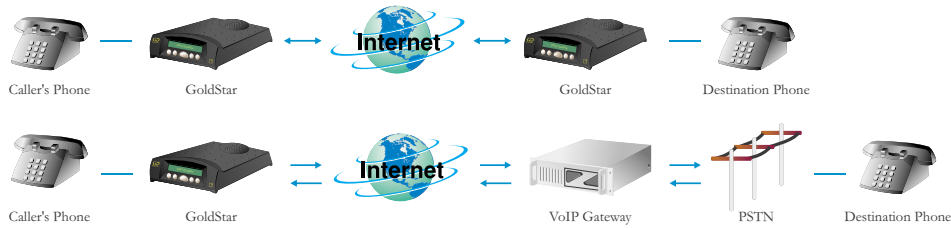

2-in-1 Design

Clear Voice Quality

User Friendly

**Call Global
& Pay Local**

Device-to-Phone Mode

The GoldStar has the ability to connect and register to DSG ITSP Network. With an active account, you can call any regular phone in the world with low calling rates. In this mode, the receiver of your call doesn't need a GoldStar.

Device-to-Device Mode

Every GoldStar has a unique ID number. Simply dial the ID of the receiving device and you will be connected to another on-line GoldStar user automatically.

Clear Voice Quality

The GoldStar's state-of-the-art compression technology is fully compliant with industrial standards. Incorporated with an advanced echo cancellation algorithm and ultra-low latency jitter control, the GoldStar delivers the best voice quality to users.

Free On-Line Upgrade

The design of the GoldStar is highly flexible. More and more functions will be added into your GoldStar via the on-line upgrade options. This ensures you can enjoy the latest Internet Telephony technologies at no charge.

All-in-One Design

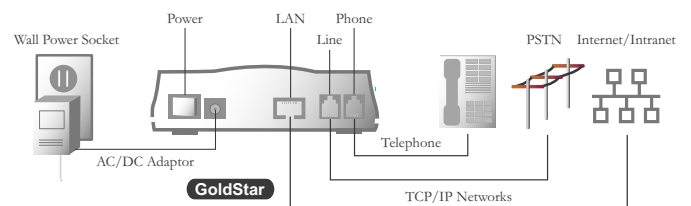

The GoldStar possesses its own processor and network interface; it works intelligently. No computer, no software and no long-distance carriers are required.

User-Friendly Interface

With a backlit LCD display, a menu key and 4-way navigation keys, the GoldStar is extremely easy to use and to configure. A smart setup program makes your GoldStar ready to go in three minutes. You can clearly monitor the complete device status from the LCD panel.

Specifications

Internal RAM	1 MB
Flash Memory	512 KB
Network Interface	One RJ45 port to LAN, Two RJ11 ports to landline and phone
Ethernet	10 Mbps
Modem	ITU-T V.34, 33600bps
Dimensions	196mm x 140mm x 47mm (7.7" x 5.5" x 1.8")
Weight	Approximately 600g (1.3Lbs)
Power Input	DC12V 1A
Temperature	0 ~ 50° C (32° ~ 122° F)
Humidity	10% to 90% non-condensing
LCD Display	16 X 2 with back light
Voice Compression	G.723.1
Compliant Internet Protocol	TCP/IP, PPP, PAP, CHAP, DHCP, PPPoE, NAT
