

Software-Based PC Phone SoftPhone

DSG SoftPhone is a Windows-based communication application offering laptop or desktop PC users a powerful and user-friendly telephony interface. It functions as a regular extension that contains the same features as DSG IP Phones. As a software-based extension, DSG SoftPhone provides high availability on LAN, VPN or the Internet for business travelers or mobile workers.

Users can easily switch between two types of operation interfaces: Standard and Compact. In the Standard mode, DSG SoftPhone also provides the same 15 programmable buttons on DSG IP Phones to customize specific features such as Auto Line Access, Internal Paging, Personal Speed Dial, and Conference Call. Besides, SoftPhone offers Phone Book and Call Log functions, so you can easily manage your contact list or directly call back through the call log window.

With SoftPhone and the Internet, business travelers or laptop users can conveniently make phone calls no matter where they are. In other words, enterprises can save huge amount of communication costs on international and long-distance calls.

Create an Efficient Mobile Office

SoftPhone offers business travelers a portable extension on their laptops. No matter where you are, you can use the SoftPhone as your extension to make or receive calls over the Internet.

SoftPhone

Software-Based PC Phone

Product Features

- Offers two types of graphic interfaces: Standard SoftPhone and Compact SoftPhone.
- Provides feature-rich functions such as Hold, Transfer, Redial, Park, Conference, Page, Voice Mail, Auto-Answer, Do-Not-Disturb, Caller ID, Mute, and Speed Dialing.
